

# GURKEERAT KAKAR

Edmonton, AB T6G 2C7 | +1 (825) 888-0227 | gurkeeratkakar@gmail.com

## Work Experience

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| <b>Dashboard Development Intern</b><br><b>AI Centre for Decision Analytics</b> <ul style="list-style-type: none"><li>Reviewed ShanghaiRankings' scoring methodology to benchmark Alberta School of Business against peer institutions.</li><li>Retrieved, cleaned, and standardized publication (Web of Science/Clarivate) and researcher (internal faculty) records.</li><li>Created visualizations using Python libraries (e.g., Matplotlib, Plotly) to support analysis.</li><li>Built Python models to translate publication metrics into "what-if" growth targets.</li><li>Maintained project code on GitHub, using version control and issue tracking to manage development.</li></ul> | <b>04/2026 to Current</b><br><b>Edmonton, Alberta</b>    |
| <b>Research Assistant</b><br><b>University of Alberta</b> <ul style="list-style-type: none"><li>Conducted analysis on large household survey datasets using RStudio to uncover socioeconomic patterns.</li><li>Performed data modeling and spreadsheet analysis, documenting for process and findings.</li><li>Developed interactive Tableau dashboards, communicating insights with visuals clearly to senior researchers.</li><li>Assisted the professor with Canvas LMS setup for students, and supported exam invigilation, proctoring, and evaluation.</li></ul>                                                                                                                        | <b>09/2025 to 04/2026</b><br><b>Edmonton, Alberta</b>    |
| <b>Data/Business Analyst Intern</b><br><b>Skill-Up Technologies</b> <ul style="list-style-type: none"><li>Automated BI reporting workflows with MySQL and Power BI, reducing manual data preparation.</li><li>Worked with management to define KPIs, resolve data quality issues, and improve metric reliability.</li><li>Analyzed engagement trends and user segments, supporting higher interaction, enrollment, and completion rates.</li></ul>                                                                                                                                                                                                                                           | <b>02/2025 to 07/2025</b><br><b>Bellevue, Washington</b> |

## Education

|                                                                                                   |                                            |
|---------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>Bachelor of Science: Computing Science Specialization</b><br>University of Alberta   3.3 + GPA | <b>Expected in 04/2027</b><br>Edmonton, AB |
| <b>High School Diploma</b><br>Delhi Public School Noida                                           | <b>07/2022</b><br>Uttar Pradesh, India     |

## Collaborated Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Credit Card Fraud Detection &amp; Responsible AI Analysis</b><br><i>Python, Pandas, Fairness &amp; Privacy Analysis</i> <ul style="list-style-type: none"><li>Built a fraud detection pipeline on transaction data, applying data preprocessing to preserve PII.</li><li>Evaluated across gender, age, and geography; conducting EDA to identify bias and imbalances in fraud predictions.</li></ul>                            |
| <b>JTI Business Analytics Dashboard</b><br><i>Tableau &amp; Excel</i> <ul style="list-style-type: none"><li>Data Quality checks, and modelling multitable datasets using Pandas and NumPy, for analysis and visualization in Tableau.</li><li>Created interactive dashboards highlighting revenue trends, repair frequency, customer distribution, and employee performance.</li></ul>                                             |
| <b>LuckySpot - Lottery Based Event Management App</b><br><i>Java, Firebase, Android Studio, GitHub CI</i> <ul style="list-style-type: none"><li>Co-developed an Android event app, implementing features across multiple user stories to design, test, and refine functionality.</li><li>Collaborated using Agile sprints, GitHub version control, and documented deliverables (test cases, CRC cards, and storyboards).</li></ul> |

## Skills

|                                                                                  |                                                                                                       |
|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>Programming:</b> Python, C, RStudio, SQL                                      | <b>Data Visualization:</b> Power BI, Tableau, Excel                                                   |
| <b>Statistical Analysis:</b> Exploratory Data Analysis (EDA), hypothesis testing | <b>Data Management:</b> Relational database design, SQL querying                                      |
| <b>Data Processing:</b> Data cleaning, transformation, and feature engineering   | <b>Professional Strengths:</b> Analytical thinking, clear communication, collaborative problem solver |

## Certifications

Hackerrank Python Skill Certification  
GLA Data Visualization with Power BI & Tableau  
DUCAT Core Python certification  
TOEFL language certification - scored 104/120

## Leadership & Volunteering Roles

|                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Vice President Internal</b><br>International Student Association - University of Alberta   May 2024 - May 2025 <ul style="list-style-type: none"><li>Revived the I-Card program to support affordability, restructured internal teams to improve collaboration, and proposed mental wellness workshops for international students.</li><li>University of Alberta Students' Union Award recipient for Global Connection.</li></ul> |
| <b>Public Relations Associate</b><br>Network of Applied Technology (NAT)   Jan 2025 - Oct 2025 <ul style="list-style-type: none"><li>Supported public relations efforts by engaging with policymakers and media partners, while strengthening outreach and stakeholder engagement.</li></ul>                                                                                                                                         |

- Assisted with drafting communications, preparing briefing materials, and coordinating outreach initiatives.
